### About This Game

Destroy the Luftwaffe!

There's something new in the air, and it's more than the hum of hundreds of aero engines... As the Luftwaffe launches its aerial offensive, the outnumbered Royal Air Force is scrambling to bring into combat new planes that will ensure victory over a stronger foe. Will they succeed? It's up to you, and your Hurricane or Spitfire. If you hold off the enemy long enough, you'll be the first to fly the Hawker Tornado and Westland Whirlwind into combat, and enable the Empire to strike back before Reichsmarschall Goering finishes his breakfast. You'll be rewarded with bonus missions, promotions, decorations, and a view of burning Berlin from the tail turret of a Halifax bomber. Join in the new Battle of Britain. Your aircraft is ready and waiting...

- Enjoy the realism of a detailed damage model, stunning graphics, and outstanding special effects

- 
- Choose between arcade and flight simulator control modes, and the RAF or the Luftwaffe in multiplayer mode
  - Get on board of one of realistically modeled planes, e.g. Spitfire and Hurricane and dive into the world of ultra realistic air fights

No Joystick Support??. Disapointing as the advertisng blurd stated that players could use a joystick if they chose to, but there is no option in the game to use one! Feel a bit conned really.. Join the Royal Air Force in their fight against the Luftwaffe.

- + Cheap game
- + Decent story
- + Simple gameplay

- Graphics
- Short game. Bit dissappointed with no Joystick Support
